

Many years ago, I was presenting on Confidence at a professional conference to a group of about 55 participants. They were excellent, engaged, and shared. A successful manager in his 60's asked to see me privately. He was very emotional with tears in his eyes. 'He wished he had learned more about enhancing confidence earlier in his career and life.'

Don't wait that long!!

He highlighted how he could have had more choices at the workplace? Confidence helps us see and expect more in life!

Take charge and do something about it NOW. 😊
